

Advancing Research. Inspiring Hope. Creating Cures.

Czar's Promise has made a **bold five-year, \$125,000 commitment** to fund groundbreaking pediatric and canine comparative oncology research at the **UW School of Veterinary Medicine** and **American Family Children's Hospital**. This innovative research will explore the links between bone cancer in children and dogs—offering real hope for new treatments and life-saving breakthroughs.

As a champion of compassionate care and impactful giving, your support is vital. While we are proud to make this multi-year investment, **we cannot do it alone**. We invite you to stand with us—helping to fund the future of this trailblazing initiative.

< FUND HOPE. SEE BACKSIDE >

Be Part of the Change.

Your gift will directly support research that bridges human and veterinary medicine, benefitting children and families facing cancer—and the beloved pets who are often by their side.

We invite you to make a lasting impact by contributing at one of the following levels:

Circle of Hope — \$1,000

Support early-stage research and bring comfort to families beginning their cancer journey.

Catalyst for Change — \$2,500

Drive progress at key milestones in comparative oncology, accelerating momentum in this vital work.

Discovery Partner — \$5,000

Invest in the discovery of groundbreaking treatments that turn today's research into tomorrow's cures.

Inspiring Courage — \$10,000

Your gift creates a lasting impact through research that unites families and their beloved pets.

Founder's Circle — \$25,000

Join our highest level of philanthropic leadership and shape the future of national research impact.

Together, we can lead a movement of healing—for children, families, and their pets. Your support today will have a ripple effect for generations to come.

WHY THIS RESEARCH MATTERS

Dogs get cancer 10x more often than humans

Their faster disease progression makes them powerful partners in advancing treatments.

20,000+ dogs and 800 children in the U.S.

Each year, far more dogs are diagnosed with osteosarcoma—helping researchers uncover faster paths to cures that benefit both kids and canines.

BE THE CATALYST: Support a Bold Vision for Pediatric and Canine Cancer Cures.
